Textile Care / Washing Instructions

To care for textile garments, avoid machine washing, drying, or ironing. Do not use bleach or harsh chemicals. Instead, gently hand wash in warm water with mild soap or a specialized textile cleaner such as Molecule Apparel Wash, available in 4 oz or 16 oz bottles from Helmet House or a local dealer. Always allow the garment to air dry. For optimal maintenance between washes, consider using Molecule Apparel Protector and Molecule Apparel Refresh. These products help keep your textile jackets looking sharp, lasting longer, and smelling fresh.
