

# Kriega® HYDRAPAK RESERVOIRS

## CARE MANUAL

### CARE

- The Plug-N-Play™ connect system needs a little bit of care to keep your adventure going. We recommend that silicone, glycerin, or beeswax-based lubricants be applied to the o-ring on the hose end fitting. Apply a small smear on the o-ring -Do not use petroleum-based lubricants, or olive oil, coconut oil, or any other types of cooking oil as they cause the seal to swell and will make the system sticky and hard to release.
- Hydrapak reservoirs are top shelf dishwasher safe for easy cleaning.
